

VDiS Visual Display Software Release Notes

VERSION 1.5 - Date: 7/3/09

New Features: None.

Corrections:

- Improved the search by time feature when used with IRIG time code. Notes: None.

VERSION 1.4 - Date: 4/21/09

New Features:

- A graphical user interface (GUI) was developed for the host command MRAT. (The MRAT command adjusts the channel meter update speed.)
- A graphical user interface (GUI) was developed for the host command (HNUM). (The HNUM command sets the highlight number in highlight mode.)

Corrections:

- An issue where VDiS was not properly displaying the time stamp after changing chart speed was resolved.

Notes: None.

VERSION 1.3 - Date: 7/09/08

New Features:

- Added column labels in LookBack mode.
- Added the ability to change event label names.
- Added commands to set the meter update rate, to reset highlights, and to time stamp highlight marks.

Corrections:

- Improved search in LookBack mode.
- Improved shut down sequence.

Notes: None.

VERSION 1.2 - Date: 7/24/06

New Features:

- Added the ability to change waveform names.
- Highlights - Can now search for, edit, and add new highlights.
- Added capture indicator.

Corrections: None.

Notes: None.
